FURTHER DETAILS OF THE TECHNICAL MEETING

SYNOPSIS :

The vision of urban greening includes green roof and vertical greening with effectiveness in water reuses and storm water management. The concepts, design, construction, operation and maintenance of green roof, vertical greening, module wetland (called rain garden in Singapore) and floating wetland will be discussed with illustrations on the overseas experience in Singapore, Japan, North America and Europe.

This technical talk is complementary to a previous Technical Visit to a Green Roof Project Downtown. Those who are interested in joining the technical visit are most welcome to attend this technical meeting.

SPEAKER :

Mr Leung Wai On is the Managing Director of Waste & Environmental Technologies Ltd. which received the Innovation & Technologies Funding from HKSAR in 2000. His experience in water treatment all over the world outstands him as a pioneer in water integration management. He was also involved in the research of wood plastic composites and its application in eco-friendly design used in urban greening projects. His successful work was recognized through various awards received worldwide, namely, the 2006 Hong Kong Eco-Product Award, the 2005 NOVA award, the 6th Asian Innovation Silver Awards (Global Entropolis in Singapore) in 2003, the 30th International Exhibition of Inventions Silver Award in 2002, the International Invention EXPO 2000 Silver Award; and the 2000 New SME Silver Award.
